COMMERCIAL BREAD SLICER MANUFACTURER

Italpan is a chief commercial bread slicer manufacturer based in Italy, with its main sector of focus being bakery machinery production. Bread Slicer CLK 420S/520S is the major model of commercial bread slicers manufactured by Italpan.

MOUNTED BREAD SLICERS

Italpan commercial bread slicers are mounted on wheels to ease movement within one or more bakeries. This reduces the efforts of constant shifting in cases of short distance movements and relocation.

THICKNESS AND TYPES OF LOAVES

The commercial bread slicers are designed with a standard passage for loaves usually. For example, model 420S has 420 mm long and 40/165 mm high passage for loaves, while model 520S has 520 mm long and 40/165 mm high passage for loaves. The machines also allows for passage of standard size thick loaves, usually 7-18. Each machine is also fixed with a 0.75 kW of power supply so as to conserve power consumption in the bakery.
